

Was there anything strange about the Covid era? - About the graphene in our brains

UNCATEGORIZED

Illustration: Scanning electron microscope (SEM) image of graphene foam, Wikimedia Commons

Graphene – a non-natural substance that does not break down in nature – is often found in Covid vaccines and now also in local anaesthetics used by dentists, and it is often spread in our environment.

This article attempts to nuance and summarise publicly available knowledge. See the background material for the guidance you need.

The article is written by Torben Haslund for informational purposes and is not intended as medical advice. Links in the article refer to background material, mainly scientific articles, for further information and guidance. The article summarises publicly available knowledge from a wide range of research articles.

Preface

We have reached a point where it is necessary to know the underlying knowledge about what is actually happening in order to have a basis for moving forward. Imagine you are walking across a busy street. If you don't look both ways, you may be lucky not to get hit by a car. If you look both ways, you may be lucky to see a car coming and avoid the accident. That is the background to this article.

Let me describe the COVID situation as I see it: What we are working with today must be supported by a core of truth in order to succeed. It is a necessity. If an impulse is based on a lie, it will self-destruct, it will decompose from within. It will compost by itself because the core in the middle is rotten. Only that which is carried by truth is viable, and it is only from this that the power to give birth to the future can arise.

The more people who preserve and nurture faith within themselves, the faster evil content will be stranded. Thousands of new freedom fighters are emerging every hour, and we can all help give birth to the new era and the new world. We have this choice, the choice between seeing what is going on and burying our heads in the sand.

If we do not know what we are choosing not to see, it may come anyway. If consciousness is to change anything, we must be aware of what is coming. The following article looks at an unnoticed substance in the COVID injections, which is also found in dental anaesthetics and in what is used for chemtrails, and which works in conjunction with 5G. The connections are easy to understand, but the background material requires professional insight. This should not deter anyone from reading the article, watching the videos and following the links.

*The world needs stable and conscious optimism,
which I believe there is reason to have.*

Note: The article describes global conditions. The international scene is therefore important. Argentine President [Javier Milei speaks about this at the UN](#), and Professor [Jeffrey Sachs](#) provides a deeply serious and humane overview of what is happening in the EU, NATO and other international contexts. [In this recording, he describes the role of the US in the Middle East](#). He starts 17 minutes in.

Summary

The article is based on the discovery of graphene oxide in the injection fluid used for the Covid vaccine. Graphene oxide is toxic, crosses the blood-brain barrier and binds to neurons in the brain, to which it can transmit radio signals. A link to detoxification is: <https://deeprootsathome.com/toxic-graphene-oxide-in-the-body-6-ways-to-clear-it/>. Here, search for '**5 Supplements to Degrade Graphene Oxide**' to get help breaking down and excreting graphene, as well as medical guidance on detoxification. The article provides links to doctors and institutions working with detoxification.

Graphene oxide has been found in places as diverse as Covid injection fluids, local anaesthetics used by dentists and fluids used in chemtrails. It does not occur naturally. It can be broken down/excreted with the help of minerals and vitamins or herbs that contain these ingredients.

As the article deals with global issues, it begins with a speech given at the UN by Argentine President [Javier Milei](#) and interviews with Professor [Jeffrey Sachs](#) about what is happening in the EU, NATO and other international contexts. These speeches are included here to put the situation into perspective.

Graphene, a very widespread and relatively new synthetic carbon molecule, has even been found in anaesthetics used by dentists.

Graphene is a relatively new substance. It is not natural. It consists of a monolayer of carbon atoms (rings). Originally developed for industrial use, it is incredibly strong and has good electromagnetic properties. It has the ability to cross the blood-brain barrier and thus enter the brain, where it [binds to neurons](#). **Here it picks up external radio signals and [communicates with our nervous system](#)**. It was found in the injections against Corona and is now found in anaesthetics used by dentists and in [substances for cloud seeding](#) (chemtrails). See, for example, the patent below and [this link](#).

(22) PCT Filed: Jan. 14, 2020	The present invention provides for an ice-nucleating particle for cloud seeding and other applications, which can initiate ice nucleation at a temperature of -8° C. Further, the ice nucleation particle number increased continuously and rapidly with the reducing of temperature. The ice nucleating particle in the present invention is a nanostructured porous composite of 3-dimensional reduced graphene oxide and silica dioxide nanoparticles (PrGO-SN). The present invention also provides for a process for synthesizing the PrGO-SN.

The present article first describes the properties of graphene and how the substance is intended to be used. At the end of the article, it explains how it can be broken down and excreted.

Finally, there is an interview with Dr. Michael Nehls about his book 'The Indoctrinated Brain'. He explains how the brain is structured and how indoctrination has developed in association with the coronavirus pandemic.

General information about graphene, including its technical properties, can be found [HERE](#). How graphene is used in dentistry [can be found HERE](#). Graphene has been found in [dental anaesthetics](#), which is the original reason for this article.

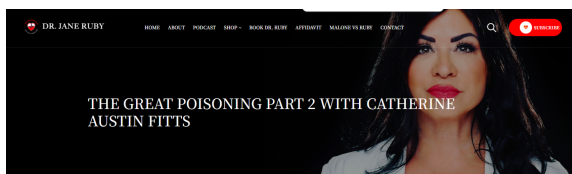

Andrew Phillips, head of Biocomputation at Microsoft Research, talks here about graphene electrodes for [controlling the brain using radio signals](#).

In this interview, Juliane Varao explains [how graphene works at the cellular level](#). At 26:30, she says that one of the largest manufacturers of dental anaesthetics has entered into a partnership agreement with Moderna, and that this collaboration has been ongoing for years.

In addition to being found in Covid-19 injections and in anaesthetics used by dentists, graphene oxide is used in [cloud seeding](#) (geoengineering, climate engineering). This is a highly controversial topic on which there are [many opinions](#). I would particularly like to refer to an [insight into the history of graphene](#) and [the Effects of Graphene Oxide Nanosheets in Freshwater Biofilms](#), which provides a little insight into what can be done with graphene.

Dr Jane Ruby, who drew attention to the link between graphene and white blood clots in embalming, interviews Catherine Austin Fitts, former Assistant U.S. Secretary of Housing and Urban Development. The interview attempts to provide a picture of the scope and complexity of the

coronavirus case: <https://drjaneruby.com/the-great-poisoning-part-2-with-catherine-austin-fitts/>

Stew Peters interviewed Dr Jane Ruby about what graphene oxide is, and in particular how it behaves in relation to our brain cells.

Digital Identity & Transhumanism: Losing Our Children & Parental Rights

11.6K VIEWS Modified: Jan 19, 2022 · Published: Jul 15, 2021 By [Jacqueline](#) · 13 Comments

It is widely known that the background to the coronavirus pandemic is the introduction of transhumanism. In this article, Lea Wilson and Alison McDowel from Stand for Health Freedom discuss the politics and use of control behind efforts such as digital vaccine passports and control via graphene in the brain. The interview and transcript of the conversation can be found here:

<https://deeprootsathome.com/digital-identity-transhumanism-losing-our-children-parental-rights/>

Early in the Covid period, Ricardo Delgado Martin discovered that **graphene can be activated by radio waves**, including 5G. He is affiliated with the research group [La quinta columna, which presents his findings here](#). Select your language at the top of the screen.

Listen to [the interview with Ricardo Delgado Martin](#). He explains what graphene and nanotechnology have to do with 5G. His findings are supported by [Prof. Dr. Pablo Campa, who also found graphene in Covid 19 vaccines](#).

There are still more examples of graphene in local anaesthetics used by dentists. One example is described here:

<https://www.flourish.dental/university-confirms-graphene-oxide-found-in-dental-anesthetics/>

Other scientific studies describing the dental use of graphene:

<https://pubmed.ncbi.nlm.nih.gov/?term=dentist%20graphene&sort=date&ac=yes>

The possibilities inherent in developing links between the telecommunications industry and neurology through the use of graphene and 5G/6G are being investigated intensively. This was a key theme at [the Mobile World Congress](#) in Barcelona in 2018. Here is [a report from the Congress](#).

Graphene, a carbon skeleton that does *not* exist naturally in nature, enters the body in many ways, - can it leave the body again? – It is not stable in the body. The article below explains how we can promote its breakdown. There are many links, so it is possible to trace the information. A link to detoxification is: <https://deeproootsathome.com/toxic-graphene-oxide-in-the-body-6-ways-to-clear-it/>. Use your browser's search function (not the page's own search

function in the top right corner) to find: **5 Supplements to Degrade Graphene Oxide** which provides help in breaking down and excreting graphene, as well as medical guidance on detoxification.

Back to the initial question: Was there anything strange about the Corona period? – In the following interview, Prof. Dr. Michael Nehls talks about brain indoctrination, which he has described in: 'The Indoctrinated Brain': <https://rumble.com/v46mtr6-the-indoctrinated-brain-with-dr.-michael-nehls.html>

If you would like more information about Prof. Dr. Michael Nehls, please visit his website. Here you will also find links to brain care:
